- Foundation of Agile
- Career Services
- Managing Freelancing Projects

📄 CERTIFICATES

Advanced Full Stack Web Development

Udacity Nanodegree

👤 PROFILE

Hi, my name is Yassin Mahmoud and I'm a frontend React developer who is passionate about creating engaging and user-friendly web experiences. As a student, my latest project was an e-commerce website that showcased my skills in building responsive layouts, implementing user authentication, and integrating payment gateways. My goal is to secure a full-time job where I can apply my expertise and collaborate with a team to solve complex problems and create innovative solutions. With my attention to detail, problem-solving skills, and proficiency in React, I am confident that I can contribute to the success of any company in need of a frontend developer.

📁 PROJECTS

e-Commerce Website

- Designed and developed a responsive e-commerce website using React, Typescript, and Tailwindcss
- Created a user-friendly interface that allowed users to browse products and add items to their cart

Netflix Clone

- Displays popular movies and TV shows on the home page.
- Allows users to create an account, sign in, and sign out.
- Allows users to add movies and TV shows to their saved movies list and remove them

Weather App

- Displays the current weather information (temperature, feels like, etc.) for a specified city.
- Allows users to search for a city and get the weather information for that city.
- Displays an appropriate icon based on the weather condition.

To-do App

- Developed a modern Todo-App using React, TypeScript, and Tailwind CSS.
- Implemented features for adding, editing, and deleting tasks with an intuitive user interface.
- Demonstrated proficiency in front-end development and familiarity with popular web development tools.

Trivia Game

- Developed a Trivia Game web application that tests the user's knowledge in various categories.
- Utilized an API to generate randomized questions with single choice answer and provide instant feedback.

SKILLS

ReactJS

TypeScript

JavaScript

Tailwind CSS

HTML

CSS

Bootstrap

PostgreSQL
